DETAILED ACTION

Claims 10, 11 and 13-15 are pending in this application.

Action Summary

1. Examiner requests the applicant to resubmit the references identified on the information disclosure statement files April 11, 2001.
2. Applicant's election with traverse of Group V in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the inventions of groups I to IV as related. This is not found persuasive because the claimed invention are drawn to treatment of different ailments.

The requirement is still deemed proper and is therefore made FINAL.

3. Examiner acknowledges the cancellation of claims 1-9 and 12.
4. The rejection of claims 10 and 11 under 35 U.S.C. 102(e) as being anticipated over Mettler is being maintained for the reasons stated in the previous office action.
5. The rejection of record under 35 U.S.C. 103(a) over Cronk et al. is being maintained for the reasons stated in the previous office action.

Response to Arguments

6. Applicant's arguments filed September 21, 2001 have been fully considered but they are not persuasive.

Applicants argue that Mettler fails to disclose or suggest with any specificity the use of a particular fragrance. Also argued is that Mettler fails to disclose or suggest the composition capable of reducing cortisol levels and/or increasing sIgA levels of the mammal. It is argued that Cronk does not disclose the use of a sensory fragrance, the

Art Unit: 1616

particular fragrances, reducing cortisol levels and/or increasing sIgA levels of the mammal, and the claimed materials according to claim 15. It is the position of the examiner that Mettler does disclose the claimed invention. Column 3, lines 33-41, discloses various fragrant oils which can be employed in the invention such as orange, rose and lavender. The composition of the prior art would inherently have the properties of reducing cortisol levels and/or increasing sIgA levels of the mammals since Mettler teaches the claimed invention. It is the position of the examiner that Cronk also discloses the claimed invention. Column 9, lines 35-67 bridging column 10, lines 1-39, describes fragrances and aromatic medications which are created by blending materials comprising odoriferous essential oils. These oils can be extracts from wood, flowers, or resins. Also, other fragrances or odoriferous compounds that can be used are benzaldehyde (aldehyde), benzyl acetate (ester) (col. 9, line 67), citronellol (alcohol) (col. 10, line 2), benzyl salicylate (benzenoid) (col. 10, line 33), and methyl dihydrojasmonate (ketone) (col. 10, lines 37-38) all of these compounds are in claim 15. It is the opinion of the examiner that the results of lower cortisol levels and/or increased sIgA levels can be achieved also by spraying an air freshener containing the fragrance, since claim 10 is directed only to a composition comprising a fragrance. It is the position of the examiner that since the prior art teaches the claimed invention then it will possess the properties of reducing cortisol levels and/or increasing sIgA levels of the mammal. The showing of unexpected results according to the applicant is not convincing to the examiner. It is the position of the examiner that applicant has not shown certain features of the tests such as how long where the panelist in the bath, the

Art Unit: 1616

disposition of the panelist before the bath, the amount of water in the bath, who where the panelists, the composition of the water with the ingredients, etc.

Conclusion

7. Claims 10, 11 and 13-15 stand rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
